

Hypertherm® Sure Cut™ Technology

DESCRIPTION:

KANO 510 is configured with the Hypertherm EDGE Connect CNC which supports True Hole, Power Pierce, Rapid Part, Remote Help, Optimized Consumable Life, and Sampled Arc Voltage. Hypertherm products are designed to work together seamlessly, making it easy to optimize cut quality, parts per hour and cost per part.

SureCut Technology includes:

- **True Hole®** technology - applies process expertise to automatically deliver bolt ready holes
- **Rapid Part™** technology - increases the number of parts produced per hour by automatically reducing cut-to-cut cycle time between parts
- **Sampled arc voltage CNC setting** - improves consumables life by automatically maintaining torch height **SureCut**

Technology benefits:

- Automatically applies optimized cutting process parameters which simplifies cutting and reduces operator intervention
- Easy set up improves job efficiency
- Provides access to Remote Help™ and troubleshooting which reduces downtime
- Works across multiple cutting technologies

Hypertherm®
