

DT4-6-5500-20

(for use with 10' ZDT, up to 300A plasma)

Why Plaser?

1. Clean Air Monitor — **Always exhausts Clean Air**
2. Complete Package “Factory Assembled Components” — **Easy installation, you just provide power and compressed air**
3. Fully welded single unit — **Leak Free performance**

- A Fork Pockets
- B Clean Air Exhaust
- C Filter Access Door
- D Motor
- E Electrical Enclosure
- F Compressed Air & Solenoid Access
- G Compressed Air Connection 1" NPT
- H Hopper & Short Legs w/20 Gallon Drum
- I Blower Access (on back)

General Information:

Motor: 20HP

Blower: Backward Inclined Airfoil

Airflow: 5500 @ 12" W.G.

Filter Cartridges: Vertical Design:
Pleat Lock A15 – MERV15 (standard)
Endurex B16 – MERV16 (optional)

Filter Quantity: (6) **Filter Size:** 14" Diameter x 52" Long

Media Area: 2,790 ft²

Compressed Air Requirements: 1" NPT Supply
Maintenance Pulse @ 30 second intervals – 8.00 scfm
Online Pulse @ 30 second intervals – 8.00 scfm

Construction: 3/16" to 11 ga. Steel, fully welded
Nema 4X - Filter Door & Control Panel Enclosure construction

Warranty: 15 year on cabinet, 5 years on components
(see Warranty Document for details)

Voltage: 480/3/60 Standard; 208/230/575/3/60 Optional

Pulse Valves: (6) 1" Electronically Actuated Solenoid

Filter/Regulator: Included

Motor Starter/Disconnect: Included

Installation Hardware: Included
(Concrete anchors, duct sealant & various hardware)

Features and Options:

Dust Containment Options:

- 20 Gallon Drum:** (1), legs, hopper and drum lid
- 55 Gallon Drum:** (1), legs, hopper and drum lid (standard)

Convenience Options:

SuperSeal Hopper Gate: Empty drum while collector is running

Electric / Controls:

- Voltage:** 480/3/60 Standard
208/230/575/3/60 Optional
- ePad:** PLC with (3.5") HMI Screen (standard)

Outdoor Installation:

Outdoor Full Cover (option)

Regulatory:

- UL Listed Controls:** ePad
- CSA Certification:** Optional, meets Canadian regulations

Energy Savings:

Auto Start - Standard

eDrive - Option: Automatically adjusts the airflow via a flow monitor and VFD to extend filter life and reduce energy consumption by up to 30%. Maintains consistent airflow throughout the life of the filters.

Safety:

Noise Attenuation Option:

– Full Acoustical Silencer Plenum (covers top of collector)

SafeSensor: Clean Air Monitor (standard)

Delta3 Spark Arrestance Plenum (standard)

Fire Suppression Options:

FM200 - Supprex 200 Premium Fire Suppression System w/Damper Sprinkler Head in Filter Cabinet

Explosion Vents: Required when cutting aluminum and other explosive materials. Contact Factory for more details.

HEPA After Filter Plenums (option)

DT4-6-5500-20

Overall Weight (Lbs): 2,800 - 3,400 (depending on options)

Door Clearance: 47" Minimum

Note: Overall height includes 20 HP motor.

- All specifications are subject to change without notice
- All CFM ratings are based upon manufacturers published performance curves at specific Inches of Water Gauge (WG) unless otherwise specified.
- RoboVent Product Group DOES NOT recommend using Dust Tray containment on High Air-to-Cloth applications.
- For heavy loading applications it is strongly recommended to use the 55 gallon drum containment option
- 20' Maximum distance from collector to cutting table (contact RoboVent if longer duct run is necessary)
